## Profile

Dedicated computer science graduate with a strong foundation in Java full stack development. Armed with certifications, I bring a blend of theoretical knowledge and practical skills to the table. Proficient in front-end and back-end technologies, I am poised to contribute to innovative and efficient software solutions. Eager to leverage my education and recent training in a challenging professional environment.

## Project

### Hostel Management System

A boys hostel Management features like room allocation, check-in/check-out procedures, billing, inventory management, and reporting. Additionally, it often includes functionalities such as user registration, attendance tracking, and complaint management for both staff and residents. This system aims to enhance efficiency, reduce manual workload, and provide a seamless experience for both hostel administrators and occupants
